

**Basic FATE (Focus Assessed Transthoracic Echocardiography):** is the original focused echosonographic protocol practiced since 1989. It is easily and quickly learned and can be applied in a multitude of clinical scenarios - pre, peri and postoperatively, in intensive care medicine, emergency department, during resuscitation, in ambulances. It provides a quick guidance for interpretation of relevant sonocardiographic findings and subsequent correlation to clinical context.

There are two FATE course levels:

Basic FATE one day course: based on two dimensional imaging of the easiest cardiac views including M-mode.

Advanced FATE one day course: basic FATE plus extended cardiac views and Doppler ultrasound for estimation of cardiac output, pressure measurements and assessment of left ventricle diastolic function.

**Objective:**

To provide the attendees with basic sonocardiographic knowledge for guidance in cardio-pulmonary optimization.
