

Basic FATE - International Course Echocardiography for Anesthetists

Basic FATE (Focus Assessed Transthoracic Echocardiography)

FATE is the original Focused Echo Protocol practiced since 1989. FATE fast and easy to learn and can be applied in a multitude of clinical scenarios: perioperatively as well as in intensive care medicine, emergency medicine and resuscitation - there are no limitations. FATE also provides a quick guidance to interpret sonocardiographic findings and how to put them into clinical context.

Basic FATE (e-learning + one day HOT* course): Based on two dimensional imaging of the easiest cardiac views including M-mode.

Objective

Provide the attendees with basic sonocardiographic needs for the non-cardiologist in order to guide cardio-pulmonary optimization.

Who Can Attend

Physicians of all specialties facing acute patients, e.g. anesthesiologists, intensivists, emergency physicians, internists, surgeons, general practitioners.

Pre-course qualification

No prior ultrasound experience is required. It is highly recommended to prepare the theoretical basics provided by an easy-to-use e-learning module. The course will primarily consist of hands on training (HOT)!

Language

English & German (HOT)

Registration fee

Early bird 520,-, ab 16.02: 560€ (300 € H, CZ, SK, SL, HR, BIH, RS)
Incl. e-learning, 1-day workshop & lunch

Registration

<https://www.afel.org/>

Venue

Anästhesie, OK Linz Elisabethinen, Fadingerstr. 1, 4020 Linz, Austria
